

## Project Sprint Planning Notes

### Team: 2

Sprint: 2

Date: 7th September 2020

Attended:

Scrum Master: Anthony Ojaimi (s3782507)

Product Owner: Danial Isman (s3786400)

Development team:

Darren Huang (s3755729)

Chinguun Undrakh (s3774562)

### 1. Goal

Implementation of the following features:

- Admin user can login, and upon successful login, the admin is able to add/edit a new employee
- add/edit working time/dates for the next month
- look at the summary of past bookings (sorted date), new booking
- view all workers' availability for the next 7 days
- A Customer can check for available days/time and services and the worker who is providing the service

### 2. Duration of the sprint

*14 day*

### 3. What is the team's vision for this sprint?

In this sprint, the team aims to complete the implementation of functionalities as stated in the goal. The items of the product backlog committed for this sprint is:

- Add employee
- Edit employee
- Add bookings
- View bookings
- Book specific employee
- Available days/time for services
- Customer to see worker providing service
- Sidebar

At the end of the sprint, a shippable product would look like when a new customer can see bookings and book an appointment. Moreover, the customer can book a specific service and employee. The business owner can add and edit employees and look at the summary of the past and new bookings. Additionally, the product is to see the dashboard at the homepage.
