

Failure and Success of CircleCI

Pass:

The screenshot shows the CircleCI interface for a successful build. The left sidebar contains navigation links: Pipelines, Projects, Organization Settings, and Plan. The main content area displays the build details for 'majorproject-private' on the 'develop' branch, workflow 'fly-workflow', and build number 56. The build status is 'Success'. The 'build' step is highlighted, showing a duration of 24s / 10s ago, using the 'Docker Medium' executor, and committing to the 'develop' branch. The author is 'SetSolve' and the message is 'Reverted to original circle config file'. The 'ARTIFACTS' tab is selected, showing a single artifact 'Parabell Run 0' with the path 'target/backend-0.0.1.jar'. The status bar at the bottom indicates 'Status: Succeeded' and 'Help'.

(This tests the main test class which tests the others)

The screenshot shows the CircleCI interface for a successful test run. The left sidebar is the same as the previous screenshot. The main content area displays the build details for 'majorproject-private' on the 'develop' branch, workflow 'fly-workflow', and build number 56. The build status is 'Success'. The 'build' step is highlighted, showing a duration of 24s / 10s ago, using the 'Docker Medium' executor, and committing to the 'develop' branch. The author is 'SetSolve' and the message is 'Reverted to original circle config file'. The 'TESTS' tab is selected, showing a large green circle with the text 'Good Job' and '1 tests are passing.' The status bar at the bottom indicates 'Status: Succeeded' and 'Help'.
